Housed in the School of Medicine, one of the top medical research institutions in the nation. Faculty from multiple disciplines will teach, advise and mentor students. Choose from a traditional Biostatistics or Statistical Genetics pathway.

MSIBS students take courses in statistical programming, biostatistics, survival analysis, bioinformatics, genetic epidemiology and ethics, among others.

INTERNSHIP
Hands on learning experience with distinguished members of the WashU community working in a research lab or department on campus.

TWO PATHWAYS
Choose from a traditional Biostatistics or Statistical Genetics pathway.

RELEVANT COURSEWORK
MSIBS students take courses in statistical programming, biostatistics, survival analysis, bioinformatics, genetic epidemiology and ethics, among others.

FINANCIAL ASSISTANCE
Both merit and need based financial assistance are available. A majority of students also participate in paid research assistantships.
